

Archbishop Jordan

Advanced Placement Program

New to the 2022-2023 School Year!

Chemistry 20AP:

Students would learn the Chemistry 20 Alberta curriculum, with extra formative labs/activities and learning opportunities from the College Board's AP Curriculum. Students would then have the option of choosing Chemistry 30AP or Chemistry 30. Students do not need to have taken Science 10AP to take this course.

Chemistry 30AP:

Students would learn the Chemistry 30 Alberta Curriculum, with extra formative labs/activities and learning opportunities from the College Board's AP Curriculum, to help prepare students to write the optional AP Exam in May that year as well as their Alberta Diploma Exam. Students do not need to have taken Chemistry 20AP to take this course.
